

SROT – Action Recording: FAQ & Troubleshooting Guide

♦ OVERVIEW

Q. What is SROT and how can I contribute?

SROT (Screen Recorder & Observation Tool) is developed by SoftAge to capture user interactions on digital platforms. These recordings help train action-based AI models. You can contribute by joining our global network of experts and earn while working flexibly.

Q. How do I join the network?

Apply through SoftAge's job posts on LinkedIn, Naukri, or Indeed. If your CV is shortlisted, you'll receive login credentials and a task. After your recordings are reviewed and approved by our auditors, you'll be onboarded and can start performing tasks and earning.

♦ LOGIN & CREDENTIALS

Q. Where do I log in and find my credentials?

Log in at: <https://app.softage.net/srot/login>

Check your registered email for your username and temporary password. If it's not in your inbox, check your spam folder or contact us at **srot@softage.ai**.

♦ ASSESSMENT TASKS

Q. How many tasks do I need to complete for assessment?

You need to complete at least **3 tasks using 3 different tools** of your choice. If a task doesn't work, contact the support team.

Q. What are the key requirements?

- Follow the instructions given in each prompt.
- Make sure the prompt context is correctly applied before recording.
- Have all necessary files or data ready to ensure smooth execution during the recording.

♦ INSTALLATION & SETUP

Q. Where can I find installation guidelines?

Log into the platform and click the 📖 (book icon) at the top-right for platform-specific guides (Mac & Windows).

Q. What is a Task ID?

A unique code is generated on the web panel for each prompt, which is required to initiate the recording process in the recording agent.

Steps to Generate and Use the Code:

- Select: Project → Operating System (OS) → Tool → Feature → Data Type
- Once selected, a **TID (Task ID)** will be displayed.
- Copy the TID and paste it into the recording agent to start recording.

Q. What is the Context?

For each task, SROT provides a **context**, which shows how your screen should look at the **start** of the recording. This is your starting point (first frame).

To complete a task successfully, make sure the context is set up exactly as described **before** you begin recording.

♦ RECORDING & SUBMISSION

Q. How to start and stop a recording?

After pasting the TID in the recording agent:

- **macOS:** Press *Cmd + Ctrl + Shift + R*
- **Windows:** Press F9
Then click **Submit**.

Q. How to move to the next task?

Click **Next Task** → Wait for new Task ID → Click **Reset** → Start next task.

♦ COMMON ERRORS & FIXES

Issue	Solution
SROT not responding	Restart the recording agent and web app. If the issue persists, reboot your system.
Recording lags or freezes	Close unused apps, check your internet connection, and restart your device.
Can't stop recording (Windows)	Follow the troubleshooting steps provided below.
Context not applied	Make sure your screen matches the starting setup shown in the prompt.
Task skipped or incomplete	Carefully review the prompt and instructions before starting.
Wrong screen/tool selected	Confirm the correct tool is open. Use the Reset button to clear filters.

♦ WINDOWS TROUBLESHOOTING (FFMPEG PATH ISSUE)

Q. My recording doesn't stop or throws an error—how do I fix it?

Follow these steps to resolve the issue by adding FFmpeg to your system path:

1. **Search & Open:**
Press **Win + S** and type "Edit the system environment variables"
→ Click to open the System Properties window.
2. **Click on "Environment Variables..."**
3. In both the top (User variables) and bottom (System variables) sections, check/edit the variable called **Path**.
4. Ensure the following path is added (modify drive letter if different):
C:\ffmpeg\bin
5. Click OK to save and close all windows.
6. Restart your PC and try using the SROT tool again.

♦ QUALITY & AUDITS

Q. What does the audit process look like?

- **System Audit** – SROT automatically checks for lag, idle time, and task performance
- **Human Review** – Experts review your recordings for task accuracy
- **Inspector Review** – Random 10% audits are done for quality control

Tip:

Maintain **<10% idle time**, use **1920x1080 resolution**, and avoid unnecessary clicks or steps not required by the prompt.

♦ OTHER CONSIDERATIONS

Q. Where can I see the number of tasks completed?

Check the **task counter** on the left panel of the web interface.
(Full task history view coming soon.)

Q. My favorite tool has disappeared from the list!

This usually means all tasks are currently exhausted.
New tasks will be added soon—meanwhile, try exploring another tool you're familiar with.

Q. Where can I check payout details?

Refer to your onboarding communication or contact **srot@softage.ai**.
